Data Scientist-Life Science

Description

Title: Lead Data Scientist

Reports to: Director of Computer Vision

Location: Southern California

Job Type: Hybrid

Salary: 140-170K

Clinical Data Scientist

To be considered, email Resume To:

Jackie@BioLink360.com

We are looking to hire a Computer Vision/Machine Learning expert with extensive experience leading the development of the marker-based AR applications, with experience in both pre-clinical and clinical applications. This is a medical device company that is known for delivering innovative and disruptive technologies across a number of medical specialties.

The person hired for this role will lead the development, validation and delivery of algorithms and implementing advanced algorithms and models for analysis, registration, segmentation and classification. This person will handle clinical trial data analysis, designing data visualization tools, and/or big data processing and oversee all reporting on development, quality, and risk management.

Responsibilities

- Utilizing diverse data sets (including log files, study data, survey data, clinical databases etc.) to inform business decisions and to create evidence that supports the ongoing success of the Ion platform.
- Designing and building complex predictive models
- Design experiments and evaluate the quality of derived assets and developing dashboards to monitor model performance.
- Proactively report on status of development, quality, and risks to management
- Design and execute experiments, A/B testing, evaluate derived assets and develop dashboards to continuously monitor model performance.
- Prepare Interactive-Dashboards, Analytics, Regression Models, Product & Operational Improvement and Quality Assurance.
- Ideates, designs, prototypes, and iterates DS/ML/AI models.

Qualifications

- Advanced degree in computer science, engineering, or a related field.
- 6+ years experience in Clinical Data Management
- Expertise in programming languages such as Python, Matlab, and C/C++
- Expertise in algorithm development for life science technologies.
- Experience with Clinical development/trial conduct, including ICH-GCP
- Big data processing experience

Hiring organization

BioLink 360

Employment Type

Full-time
